Emergency Drench Shower

Product Code: S1100

This ceiling mounted safety shower is our basic emergency shower unit. The discreet design and ceiling mounting assembly mean that this unit can be installed almost anywhere without causing a distraction, while the bright yellow ABS plastic head makes it easy to find in an emergency.

The ceiling mounted safety decontamination shower is operated by a low resistance pull rod, constructed from stainless steel for extra durability. While the unit is approved by the ANSI (American National Standards Institute), there are certain obligations you must fulfill in order to attain full ANSI compliance, which is why we've also included a waterproof test card to help encourage weekly functional inspections. See our guide to ANSI Z358.1 regulations for further information.
