# Combined Emergency Shower & Eye Wash Unit

Product Code: S2340

This emergency shower and eye wash unit combines an emergency drench shower with an eye wash station to form the ultimate all-in-one workplace safety solution. Floor mounted via a cast iron flange for stability, the unit can be installed almost anywhere - close to hazardous areas or machinery, or wherever the layout of your workspace dictates.

The shower head and eye wash bowl on this emergency shower and eyewash station are all constructed from heavy duty stainless steel for sturdiness, and the unit comes with bright yellow detailing for enhanced visibility. The eye wash unit is operated by an easy-push paddle, and the safety shower by a low-resistance stainless steel pull rod; they can be used either together or separately.

You'll also find a built-in waterproof testing tag to help you meet the stringent testing requirements of the ANSI Z358.1 regulations. As well as governing the ways in which emergency showers and eye wash fountains are manufactured, they also cover their installation, maintenance and use; please visit our guide to ANSI regulations to find out more about staying compliant.

### Delivery

From stock 1 to 2 working days delivery time
