# Portable Eyewash Station

Product Code: S0P50

Our portable eye wash station is perfect for site work in isolated areas with no access to clean, potable water. Manufactured from sturdy, UV-resistant polyethylene, the unit is bright yellow to ensure visibility even when eyesight is compromised in an emergency situation. This ultra-portable eye wash unit requires no plumbing and can either be mounted to a wall with the included wall bracket, or simply placed on a flat, stable surface.

The portable eye wash fountain is activated by a simple pull strap, which will cause the unit to discharge water for over 15 minutes in accordance with ANSI regulations.

The unit also comes with a built in service tag to facilitate regular safety inspections. If you choose to mount the unit to a wall, please ensure that it is installed between 838mm and 1143mm from floor level.

Water preservative specifically for portable eye wash units is available from other sources to extend the life of the water in these units.

### Extras

No extras are available for this product

### What is ANSI compliance?

The American National Standards Institute governs the development of industrial standards for the United States and across the world. The specific regulations that govern emergency eye wash products (ANSI Z358.1) set out guidelines for water quality, temperature and flow rate, as well as product installation and maintenance procedures. See our guide to ANSI regulations for more information.

### Related products

We also provide a range of fixed eye wash stations, including wall mounted eye wash stations, pedestal eye wash stations, and freestanding eye wash units.
