

Pedestal Eye Wash Station

Product Code: S0320

Our pedestal eye wash station is constructed from stainless steel and ABS plastic, both in a high-visibility yellow finish to enhance visibility. The fact that the unit is floor mounted means that it can be installed close to especially dangerous areas of your workspace. In some larger facilities, a wall mounted unit would take too long to reach in an emergency - a pedestal eye wash unit is the perfect solution.

Pedestal eye wash fountains are turned on by a simple low resistance lever and can also be customised to include a foot control if desired. The nozzles are protected from airborne contaminants by dust caps which automatically open when the unit is activated. We also include an inspection tag to facilitate the weekly functional testing that is required in order to meet the ANSI safety regulations. We also sell a [pedestal eye wash fountain with a stainless steel bowl](#) for even greater durability.

Delivery

From stock 1 to 2 working days delivery time

Orders placed before 11.30am will be despatched for delivery next working day, or two working days if ordered after 11.30am

Tech specs

Height (floor to nozzle): 1059mm

What is ANSI compliance?

Emergency eye wash products are regulated by ANSI Z358.1. These regulations dictate the flow rate and temperature of the water used, as well as product installation, maintenance and inspection.

Although based in the United States, the ANSI (or [American National Standards Institute](#)) administers industrial standards the world over. [Visit our guide to ANSI regulations](#) to learn more about the American National Standards Institute and find out how to achieve compliance.
