

Pedestal Eye Wash Fountains With Stainless Steel Bowl

Product Code: S0340

Our pedestal eye wash fountain with stainless steel bowl is constructed from heavy duty materials to give you the ultimate in reliability. In an emergency situation, seconds really do count, which means it's important to install emergency facilities within easy reach. This unit is designed to be mounted to the floor rather than a wall, meaning that you can position it where it's needed most.

Fitted with a stainless steel bowl, the pedestal eyewash unit is powder coated in high visibility yellow to ensure that the unit can be easily located even in situations where eyesight is compromised. Activation comes via an easy-push handle or optional foot control pedal, meaning the unit can be operated hands free, while an integrated inspection tag helps you stay on top of the weekly functional testing required by ANSI regulations.

[Eyewash with cover](#)

What is ANSI compliance?

Like all the products on [Safety-Eyewash.co.uk](https://www.safety-eyewash.co.uk), this stainless steel pedestal eyewash station conforms to ANSI Z358.1, as set out by the American National Standards Institute.

As well as issuing guidelines on how safety eyewash products are manufactured, these regulations also cover the way they are installed, maintained and inspected, meaning it's important to get to grips with them when making a purchase. To find out more about the regulations, [take a look at our handy guide to ANSI Z358.1](#).
