Emergency Eye Wash Station With Foot and Hand Operation

Product Code: S0340-HFC

This emergency eye wash station has foot and hand operation to ensure that it can be used in serious emergency situations in which the hands of the user may also have been injured. The entire unit is constructed from hardwearing galvanised steel with a stainless steel bowl for unbeatable durability, and the pedestal is powder coated in ultra bright yellow to enhance visibility.

This unit is floor mounted so that it can be installed within easy reach of your employees, whatever the size and layout of your workplace. The spray nozzles are protected from dust and debris by auto-flip caps. The unit also comes with a built-in inspection tag, designed to encourage the weekly safety inspections that are required in order to comply with ANSI regulations.

This emergency eye wash unit with foot and hand operation currently has no accessories available.

What is ANSI compliance?

The American National Standards Institute (or ANSI) is a regulatory body which administers industrial standards both domestically and across the world.

Safety eye wash products are regulation by ANSI Z358.1. As well as determining the way safety eye wash fountains are manufactured, they also govern the way in which they are installed, maintained and tested - the responsibility for this lies with you. To find out how to achieve compliance, visit our guide to the ANSI regulations.

Related products

Smaller workplaces can benefit from wall mounted eye wash stations, which are both cheaper and simpler to install. Our portable eye wash fountains are ideal for businesses that perform site work, especially in remote areas without a clean water supply.

In addition to our eye wash range, we also supply emergency showers and all-in-one safety shower eye wash units.
