Freestanding Eye Wash Unit With Lid

Product Code: S0340-CS1

This freestanding eye wash unit comes with a lid to protect the underlying spray head assembly from airborne contaminants and debris. Constructed from galvanised steel with a stainless steel bowl, this unit is built to last a lifetime, while the bright yellow powder coating makes it highly visible and easy to locate, even with compromised vision.

Freestanding units are perfect for large workplaces because they don't need to be hung from a wall; instead, they can be installed close to hazardous areas where they're needed most. In order to comply with ANSI regulations, the unit must be inspected and tested on a weekly basis. We have included a waterproof inspection tag to help make this process as simple as possible.

Delivery

From stock 1 to 2 working days delivery time
Orders placed before 11.30am will be despatched for delivery next working day, or two working days if ordered after 11.30am

No options currently available.

What is ANSI compliance?

The ANSI Z358.1 regulations are a way for both the manufacturer and the end user to ensure that safety eye wash equipment is used in the correct manner. Set down by the American National Standards Institute, the regulations cover water temperature and flow rate, installation location, maintenance and training.

To learn more about the regulations and find out what you need to do to comply, please visit our ANSI regulations guide.

Related products

Our wall mounted eye wash stations are perfect for smaller facilities where wall mounting is a more viable option. Our portable eye wash stations have their own inbuilt water reservoir, meaning they can be used anywhere. This makes them especially popular with business that carry out work on site, particularly in remote areas.
